Business Performance Review Terms & Conditions

Business Valuations & Strategies (“BVS”) will perform a Business Performance Review of your company.

A Business Performance Review consists of:

1. Summarizing 3 years of financial data (income statement & balance sheet) in a side-by-side format
2. Presenting 3 years of common-size (percentages) financial data in side-by-side format.
3. Calculating up to 16 common financial ratios for your company. Some ratios may not apply to your company.
4. Comparing your ratios to ratios from other similar companies in your industry
5. Scoring your company’s performance in 5 key areas: liquidity, assets, borrowing, sales, and profitability by evaluating company trends and industry averages

BVS will present the information stated above and the findings of our analysis in a written report. The report contains descriptions and explanations of each ratio. The ratio analysis (scoring) section contains a written analysis of the company’s performance in each key area. A sample Business Performance Review report is available for review at the Managing4Results.net website.

BVS will be relying on the accuracy and reliability of the financial data provided to them. BVS will not audit, review, or compile your financial data, and will not express an opinion or any form of assurance on them.

Although industry statistics are a useful source of general analytical data, there can be significant variation in the reporting practices and operational methods of companies within a given industry. Therefore, industry statistics should not be regarded as absolute norms or standards.
